Spring Sonata™ Indian Hawthorne

Raphiolepis indica 'Wilcor' PP#17972

Spring Sonata™ is in perfect tune with today's gardens. It offers dense growth, glossy green foliage, and a massive display of white flowers in spring. Growing 4 feet high and 5 feet wide, Spring Sonata™ blooms 2 to 3 weeks later than other Indian hawthornes, extending the bloom season. In fall and winter, dark purple fruit cover the plant, adding welcome color.

Use it in foundation plantings, mixed borders, or containers. It's also a great choice for the beach, because it tolerates salt spray.

FEATURES

Key Feature	White flower clusters in spring
USDA Zones	Hardy to 0°F USDA zones 7-10
Exposure	Full sun to part shade
Dimension	4' tall x 5' wide
Growth Rate	Moderate to fast growth

CARE

Water	Water as needed
Soil Type	Well-drained garden soil
Fertilizer	Early spring
Pruning	Shape after spring bloom
