

# Illumination® 'Apricot'

## DIGIPLEXIS®

*Digiplexis® Illumination® 'Apricot'*

Striking spires of bell-shaped blossoms illuminate this re-blooming perennial in hues of apricot orange. Enhanced with speckled yellow throats and a dark lip, blossoms draw hummingbirds and butterflies into the garden. This sterile selection is perfect for borders, containers and cutting.

### USE

Ideal for beds, borders and patio pots; great cut flower

### BLOOM / BLOOM TIME

Bi-color orange-apricot blooms spring to fall

### GROWTH RATE

Fast

### WATER

Keep dry until established; avoid overhead irrigation

### SOIL

Well-drained, moist garden soil

### FERTILIZE

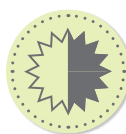

Use a balanced liquid feed with micro nutrients until established

### PRUNE

Prune dead growth after flowering to promote new growth
